ARIT LECTURE

New Perspectives in Hittite Archaeology

by

Yiğit Erbil

Department of Archaeology, Hacettepe University

10 March 2026, 7:00 pm (Turkish time), Hybrid

As a dynamic field of research, Hittite studies have long occupied a central place in Anatolian archaeology. In recent years, a substantial number of new discoveries have significantly advanced our understanding of the culture and history of the Hittites and of Late Bronze Age Anatolia more broadly. This talk explores recent archaeological finds and emerging research approaches in Hittite studies, highlighting their implications for reconstructing the Hittite world.
